

Touch football—
how to play,
how to survive,
how to win!

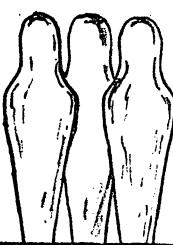

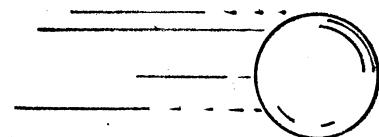

CROWN CRIER

Volume: 23

September Issue

GIRLS BOWLING
-TIED FOR FIRST-

ate of the Arts.....Dave Stuber
Puzzles.....Gerald Stanley
Women's Page.....Kate Moore
Sharon's Smog.....Sharon Johnson
Cover.....John Miller &
Lucy Miller
Editor.....Lucy Miller

Editor's Note:Lucy Miller

Since this is the last "Crier" I'll be editing, I would like to say a special "Thank you" to all of you who have helped in your efforts and articles to make this paper of ours a success.

I have received several compliments on the quality of the material which you handed in to be printed, and would like to pass them on to you. So keep them coming in to Phyllis Gates.

As I look to the months ahead I know you will give your full support to my successor. I'm already looking forward to the October issue, since I'll be in school and feeling kinda lonely.

I would like to say again, "thank you all" for your cooperation & I'll join Tennessee Ernie Ford in saying "God bless your little pea-picken hearts!"

Birthday Corner.....OCTOBER

1----Carol Dolby
5----Rachel Hanlon
15---Mary Ellen Wade
17---Sylvia Miller
18---Rachel Eger
18---Nancy Peck
22---Paul Gerard
22---Carol Wiebe
31---Lowell Huffman

State of the Arts.....Dave Stuber

There are seven new employees at Crown this month.

First, June Gunter is working on the Amp Line and plans on finishing school.

Gwen Wenger is on the IC-150 line during completion of school, and then plans on settling down and becoming a housewife.

Victoria Richmond has just started in the Stockroom.

Tom Dinkledine is working on one of the benches in Set/Comp.

Pat Evans is helping on the Transport Line during the day, and enjoys yard work and watching football in her spare time.

Richard Eger is back again helping out with the maintenance work and attends Grace Theological Seminary and plans on getting involved in Foreign Missions.

Carol Avery is helping in the Sales Office.

I would also like to note that Carol Wiebe has been promoted from Sales to the Switchboard.

I have completely lost track of all the new cars, but I do know of a couple. Ron Nelson got a new Vega, and Melvin Smith traded his Pinto on a Plymouth.

COMING CLEAN

Though football leaves my child's shirt
Saturated through with dirt;
And baseball makes his pants a
mass
Of smudges, smears, and stains
from grass;

While running games provide
great stocks
Of dirt and sweat-embedded
socks,
Such sports, when all is said and
done,
Are always known as "good,
clean fun."

—DONNA EVLETH.

following poem is dedicated to
own's fall brides.

BRIDAL SHOWER

You'll get at least two coffeepots,
Assorted irons and toasters;
A starter of dinnerware,
Both glass and stainless roasters;

A couple fancy cookie jars,
And towels and sheets galore;
You'll think your cup is really
full,
You couldn't wish for more.

But husbands being what they
are,
You'll need—but never get—
Pliers, screwdriver, and wrench
In matching bridal set!

—MILDRED ELLIOTT.

Supervisor Notes.....Richard McCreary

Our department is made up of several
different segments.

The Wire-Cut area has Bertha Kane on
amplocks, Carol Dolby running the wire-cut
machine and Goldie Straw & Sylvia Miller
cutting the tubing and cables. The safty
and set-up knowledge needed for Carol's
and Bertha's machines is considerable.

As with every part of our department
they must keep up with their status on
each batch in the shop. This has been
complicated lately due to the fact that
our suppliers have failed us on wire
shipments.

Sandy Rowe and Sharon Jackson have
been doing their best to keep the assembly

(continued in next col.)

lines in modules. Sandy also runs a perpetual inventory of all parts and modules in our department. During her spare time she is writing a procedure book and scheduling the modules.

Richard Putz, Jean Strycker, Mike Weldy, Don Mitchell, and Frank Sutley are keeping the inspection, curve tracer, eyelet and air press going. Don has been repairing logic boards. Richard also schedules the areas and is writing procedures on the eyelet & air press machine.

Don (Rick) Wilson does our silkscreening in the evenings after school.

This is a group of people that have "risen to the occasion" time after time during the past year. It is the nature of our type of work that they are always working on pressure jobs, yet their worries are that they won't be able to get it done on time. They almost always make it and I know they will continue to make it! A good job well done.

Our job still wouldn't be possible if we didn't get the excellent co-operation of the other department supervisors. Time and time again they have come to our aid. Working with all of these people is a pleasure.

+++++

WORK

Marking time will get you nowhere;
Waiting never pays.
True success comes when you're working,
Not in idle days.
Wishing will not make your dreams true;
Sighing helps you none.
Getting out and keeping busy
Is the way it's done.
Many people, far too many,
Dream their lives away,
When the way to true success is
Hard work done each day.
Dreams are fine for setting life's goals,
Fine when heartaches lurk.
But the only way to reach dreams
Is to get out and work!

—SALLY H. BRICKLEY.

FALL SELLING AND INDUSTRIAL

SALES DEPARTMENT

crown industrial products

The Industrial Sales Department was formed by the CROWN management to give CROWN a broader product base and selling base for its high quality products. We manufacture products that are for Hi Fi use as well as Industrial use. You may wonder what an industry would do with a CROWN DC-300A. A typical example would be a large shaker table to run vibration tests on a piece of equipment, a very high class battery charger used for research of electrodes to determine which electrodes would give the best long life characteristics. These are just a few examples of what an industrial sale means to CROWN.

How does CROWN go about reaching industrial people in manufacturing facilities across the country with the product information necessary for them to be able to buy CROWN? We have established the Industrial Selling Division which has a representative network that is very similar to the Hi Fi representatives only it is comprised of men whose sole function is to call on industry and sell them CROWN products.

The Hi Fi division, with Jim and Ken in charge, sells through manufacturers representatives, but those representatives in turn sell to retail Hi Fi dealers who in turn sell to the general public. This is the difference between the Industrial Sales Division and the Hi Fi Sales Division.

In the Industrial Sales Division, there is more work required by CROWN in communicating directly with the end user and the manufacturer, trying to serve his needs with our products. Quite often there is engineering consultation that is required also more product information than in the Hi Fi Division. CROWN has engaged an advertising agency, Welsh-Bencsics, to put together a catalog system for the Industrial user. The agency is also responsible for developing a mailing list to mail catalogs and product information to Industrial buyers.

Some of the products that the Industrial Division sells that we presently manufacture are; the Dyanlec tape transports, the Scott Engineering tape transports, and the Art Vetter tape transports. These manufacturers in turn include our tape decks in their standard systems. For instance, Dyanlec builds a military troupe entertainment system that is installed in submarines and ships to provide background music for the enlisted personnel's enjoyment. The A. R. Vetter decks are used in an FM recorder system that Art Vetter builds and markets to hospitals and the instrumentation field. An FM analog tape recorder has the ability to record DC signals, as well as AC signals. Beltone Electronics buys our D-60 amplifier in large quantities for use in an audiometer which is a device that tests hearing in speech and hearing classes. The Beltone account is a direct result of our participation in the National Speech and Hearing Show in San Francisco last year.

What is the sales outlook for this fall in the Industrial Sales Division? Because we are signing up new representatives and creating new catalog materials, the sales prospective is not as great as it will be after the division is operating for several years. So production can rest assured that the Industrial Sales Department has not begun the burial proceedings as yet. Give us a year or so.

The overall goal of the Industrial Sales Division with respect to CROWN is to help the Company level production so that the influences in the Hi Fi market during the Christmas buying season can be leveled and we can have a firmer base of products upon which to establish our Company.

Column.....John Bachman

Bowling is here again and many leagues are forming. Several "Crownies" have taken to the lanes this year. Good luck to all!

The softball team ended their season well, by finishing high in the city tourney. After eliminating Weavers, Crown went to work on Frigiking. Trailing 5 to 1 the Clowns put on a spurt and tied the game at 5. In the bottom of the last inning three consecutive singles by Bob Hunt, Larry Dennison and Dave McLaughlin eliminated Frigiking. The following night Crown lost a heartbreaker 8 to 5 to end the season.

Football appears to be the call of the wind during this fall season. It won't be long before Dave Stuber and Steve Peer will be called for clipping each other by the referee. The first scrimmage is being scheduled for Thursday, Sept. 13. The games will be played in the field out back and the stands will be erected some time around the 1994 season! This according to Dave McLaughlin, League Director. Football has been one of Crown's most impressive sports in the past, since the players are all from Crown and so Crown has to win!

Crown's "King of the Court" Rich McCreary tells us he's watching the paper for some sign of city basketball. Could it be the "Wallowing Wizard" is forming a team????

+++++

Some Other Game

An extremely inexpert golfer was slowly struggling his way around the course. Seeing the contemptuous look on his caddy's face, he apologized:

"I'm not playing my usual game today."

"No?" said the caddy. "And what would that game be, Sir?"

CROWN BOWLERS.....Mary Miller

On Friday evening you could have heard a pin drop---as the Crown Bowling Team went to work on the first games of the season. We bowled against the Tebo Mowers and we mowed them down, beating them by 400 pins and taking all three games!

There are 10 teams competeing for a trophy at the Astro-Bowl in Dunlap this year.

We did a lot of laughing and some serious bowling too, as our scores show. Totals for three games:

Captain--Cheryl Crow---377

Marcie Kidder--368

Shirley McCreary--292

Mary Miller---393

Carlene Smead--367

Subs-----Lois Roberts

Lucy Miller

SUPER BOY EXPOSED

A college freshman football player was interviewed by the big university coach.

"Yes," said the student, "I can run 100 yards in less than 10 seconds, with full uniform. I block so well that last season four of our opponents had broken legs. As for passing, I can pass about 60 yards on the average--into the wind. As for my grades, I have always been on the dean's list."

The coach was impressed. "But, son," he said, "every one of us has some weakness or deficiency. What is yours?"

"Well," said the candidate, "I am inclined to lie a little."

SYSTEMS ANALYST???. Ken Yoder

From time to time, various people have asked me what a "Systems Analyst" actually is. Not usually having a pat answer to describe these strange creatures, I thought I would have a copy of a "Systems Analyst Test" printed, to give you an idea of the many subjects a systems analyst should know about. With special thanks to Crown for allowing me to print their hiring material, here is the test.

A TEST FOR SYSTEMS ANALYSTS

INSTRUCTIONS: Read each question carefully. Answer all questions. Time limit: 4 hours. Begin immediately.

HISTORY: Describe the history of the papacy from its origins to the present day, concentrating especially, but not exclusively, on its social, political, economic, religious, and philosophical impact on Europe, Asia, America, and Africa. Be brief, concise, and specific.

MEDICINE: You have been provided with a razor blade, a piece of gauze, and a bottle of Scotch. Remove your appendix. Do not suture until your work has been inspected. You have fifteen minutes.

PUBLIC SPEAKING: 2500 riot-crazed aborigines are storming the classroom. Calm them. You may use any ancient language except Latin or Greek.

BIOLOGY: Create Life. Estimate the differences in subsequent human culture if this form of life had developed 500 million years earlier, with special attention to its probable effect on the English parliamentary system. Prove your thesis.

MUSIC: Write a piano concerto. Orchestrate and perform it with flute and drum. You will find a piano under your seat.

PSYCHOLOGY: Based on your knowledge of their works, evaluate the emotional stability, degree of adjustment, and repressed frustrations of each of the following: Alexander of Aphrodisias, Rameses II, Gregory of Nicia, Hammurabi. Support your evaluation with quotations from each man's work, making appropriate references. It is not necessary to translate.

SOCIOLOGY: Estimate the sociological problems which might accompany the end of the world. Construct an experiment to test your theory.

ENGINEERING: The disassembled parts of a high-powered rifle have been placed on your desk. You will also find an instruction manual, printed in Swahili. In 10 minutes a hungry Bengal tiger will be admitted to the room. Take whatever action you feel appropriate. Be prepared to justify your decision.

ECONOMICS: Develop a realistic plan for refinancing the national debt. Trace the possible effects of your plan in the following areas: Cubism, the Donatist controversy, the wave theory of light. Outline a method for preventing these effects. Criticize this method from all possible points of view. Point out the deficiencies in your point of view, as demonstrated in your answer to the last question.

POLITICAL SCIENCE: There is a red telephone on the desk beside you. Start World War III. Report at length on its socio-political effects if any.

PISTEMOLOGY: Take a position for or against truth. Prove the validity of your stand.

PHYSICS: Explain the nature of matter. Include in your answer an evaluation of the impact of the development of mathematics on science.

PHILOSOPHY: Sketch the development of human thought, estimate its significance. Compare with the development of any other kind of thought.

GENERAL KNOWLEDGE: Describe in detail. Be objective and specific.

2.

Answers to issue 22's problems

The answer is that the young man on his third choice of a door has a probability of $9/10$ that he will choose the lady. The pair of doors concealing two tigers is eliminated by his first choice of a lady, which leaves 10 equally probable possibilities for the entire series of three choices.

If the doors conceal two ladies:

Lady 1 — Lady 1 — Lady 1
Lady 1 — Lady 1 — Lady 2
Lady 1 — Lady 2 — Lady 1
Lady 1 — Lady 2 — Lady 2
Lady 2 — Lady 1 — Lady 1
Lady 2 — Lady 1 — Lady 2
Lady 2 — Lady 2 — Lady 1
Lady 2 — Lady 2 — Lady 2

If the doors conceal a lady and a tiger:

Lady 3 — Lady 3 — Lady 3
Lady 3 — Lady 3 — Tiger

Of the 10 possibilities in the problem's "sample space," only one ends with a fatal final choice. The probability of the man's survival is therefore $9/10$.

31. a little business advice

$$\begin{array}{r} \text{D E F E R} \\ - \text{D U T Y} \\ \hline \text{N O G O} \end{array}$$

This cryptogram represents a subtraction. Since the answer does not contain a digit at the extreme left, then D must equal 1. Now, if D = 1, E must equal 1 or 0, for $10 + E - 1 = N$; that is, $9 + E = N$, and N cannot be greater than 9, for it is a digit. But E cannot equal 1, for D = 1; hence, E = 0. It immediately follows, since $9 + E = N$, that N = 9. Thus, so far, we have result (1).

$$(1) \quad \begin{array}{r} 1 \ 0 \ F \ 0 \ R \\ - 1 \ U \ T \ Y \\ \hline 9 \ O \ G \ O \end{array}$$

Now, to subtract T from 0, we must borrow one unit of a hundred from F; thus, $F - 1 = U + O$. Since we have already used 0, 1, and 9, and U and O are integers, then F may be 8, 7, or 6. If F = 8, then $U + O = 7$ and $U + O = 5 + 2$; if F = 7, then $U + O = 6$ and $U + O = 4 + 2$; if F = 6, then $U + O = 5$ and $U + O = 3 + 2$.

Assuming that F = 8, then let U = 5 and O = 2. We then have result (2).

$$(2) \quad \begin{array}{r} 1 \ 0 \ 8 \ 0 \ R \\ - 1 \ 5 \ T \ Y \\ \hline 9 \ 2 \ G \ 2 \end{array}$$

From the ten's column, $10 - T = G$, or $10 = T + G$. Since we have already used 0, 1, 2, 5, 8, and 9, the possible combinations are 6 + 4 and 7 + 3. It may be easily shown that the combination 6 + 4 is impossible; thus, let T = 7 and G = 3. We then have result (3).

$$(3) \quad \begin{array}{r} 1 \ 0 \ 8 \ 0 \ R \\ - 1 \ 5 \ 7 \ Y \\ \hline 9 \ 2 \ 3 \ 2 \end{array}$$

Hence, $R - Y = 2$ and it immediately follows that R = 6 and Y = 4; thus, the operation is,

$$\begin{array}{r} 1 \ 0 \ 8 \ 0 \ 6 \\ - 1 \ 5 \ 7 \ 4 \\ \hline 9 \ 2 \ 3 \ 2 \end{array}$$

This mon's. problems

II. THE BENEVOLENT PASTOR

The Rev. Thomas Goodenough was one of the good old-fashioned sort. No one in distress ever appealed to him in vain, for his heart was full of the milk of human kindness. Of course he was often imposed upon as such good natured people are; but that made no difference. He loved his parishioners and they loved him.

One evening as he was wending his way home somewhat wearily, for he had had a heavy day, he met successively three needy persons who begged his help. He found that he had only coins in his pocket. To the first he gave half of what he had, and one penny over. To the second he again gave half of what was left and one penny over. To the third he gave half of what still remained and four pennies over. He thus reached home with only four pennies. How much had the worthy pastor to begin with? 70¢

40. ANOTHER CENSUS STORY

It was nine o'clock and the boys had assembled for their lesson in arithmetic, the teacher believing that the best time to hold classes in mathematics is the morning when everyone is fresh and alert.

"You will remember, boys," the teacher began, "that a few days ago a local census was taken, when it was found that our population is represented by a square number comprising five digits of two kinds which we can represent by *ababa*. The sum of the digits *b* is the same as that of digits *a*. What is the population?"

$\frac{a}{b} = \frac{2}{3}$ $a, b = (2, 3)$ or $(4, 6)$ or $(6, 9)$

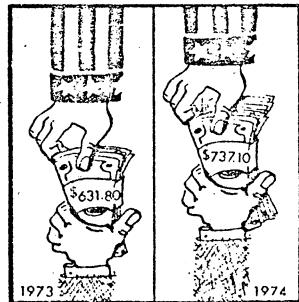

"I am extremely pleased to approve this measure. It should be good news for millions of our citizens," said President Nixon as he signed into law H.R. 7445, a bill extending the Renegotiation Act of 1951 for one year.

But the President wasn't talking about renegotiation. He was describing a little rider that had been piggy-backed onto the bill to pay out some \$3.2 billion more in Social Security benefits next year to some 30 million people.

It may be good news for the beneficiaries, but not for the employers and employees who will have to pay the increased taxes.

This year's maximum Social Security tax is \$631.80 on an employee earning \$10,800, plus a matching contribution by his employer. Next year it jumps to \$737.10 or a combined \$1474.20 on every \$12,600 job.

Let's see now. There was a

10% increase in Social Security benefits in 1967, 15% in 1969, 10% in 1971, 20% in election year 1972, plus this new 5.6% increase. Then automatic cost-of-living increases begin in 1975.

If Congress doesn't quit this overexpansion of Social Security, a lot of people are going to figure it's cheaper to retire than work.

Prove it to yourself. Who do you think will quit first—you or Congress?

POINT OF PHEW

Pause and consider the skunk and his plight
When he amorously seeks a mate that's right.
He can't ply with candy his Ruth or Thelma,
With only his perfume must he overwhelm her.
So stop and reflect if you're out camping—
And accidently on a skunk you're tramping,
Show some compassion as you air out your tent
What is noxious to you is to her heaven-scent!

—WESLEY H. FAUNCE.

GERALD STANLEY

46. the christians and turks

Josephus, the author of a Jewish History, escaped death by working a problem similar to this one. When the Roman emperor Vespasian captured Jotapata Josephus with forty other Jews had to hide in a cave. All those in the cave decided to kill themselves rather than fall into the hands of their conquerors. Not wishing to go along with this decision, Josephus persuaded the others that they should die by lot. He then suggested that they should arrange themselves in a circle and that every third person should be killed. He arranged all those in the cave so that all of them were killed except himself and another whom he might easily destroy or persuade to yield to the Romans. In the middle ages, this problem took the following form: Fifteen Christians and fifteen Turks were carried as passengers in a ship when they met a violent storm. It was decided that to save the ship and crew, half of the passengers had to be thrown overboard. To carry this out equitably it was agreed that the passengers be placed in a circle and every ninth man be cast into the sea until one half of them had been thrown overboard. The captain, being a Christian, arranged them so that all Christians were saved. How did he arrange them?

Sharon's Smog.....Sharon Johnson

You know the honeymoon's over when you go grocery shopping. It can be a real hassle!

Last week, on a regular dreaded trip, I was squeezing the bread when one of them giggled "You know we're the fresh guys". I jerked my hand back and looked around. I squeezed again. Again, a giggle. I decided to get a non-giggling brand and took off. Further down the aisle, this guy with a weird double mop asked me to try the mop. I declined, let the grocery stores mop up their own floors!

As I advanced through the store, I ran into Durwood Kirby who had the nerve to tell me my dishwashing liquid was all wrong for me and his was cheaper to use. I told him, "That's ok, where else can you find a pet dove who keeps your dishwashing liquid on your bedroom dresser?"

I got through the checkout counter and out the door whereupon I was attacked by a mugger trying to take my Tide away! He went into a state of shock when he discovered I didn't even have Tide! I use the low-phosphate kind and he tried to give me some. Personally, I think gray is a gorgeous color and grease stains add a certain personality to my wash.

Home....as I stand there losing my grip on two bags of groceries, my husband is reading the dog food labels & telling me what a dummy I am for getting the one with cereal in it. I smiled my "ultra-brite" smile & told him if he

(continued in next col.)

could live on "Sir Grapefellow", "Mister Frankenberry", "snap, crackle & pop", the dog would surely survive!

As I unload the groceries, the following nightmare occurred; "Big Wally" stepped out of the wall & my husband accused me of.....well, never mind. My mother-in-law arrived, smuggling her own (whisper) 'toilet paper' in. She stopped whispering and started screaming! I was out of paper towels! She proceeded to advise me to buy 'Scottowels' cause "you get more for your money, honey". Sigh! I pulled out a box of Puffs and decided to stick some in my ears since they claimed to "help soften the blow"...

Mayhem started. The dog was chasing a miniature covered wagon being pulled by a miniature horse, which disappeared into the cupboard, I screamed! The "Jolly Green Giant" & "Big Wally" were tied in an Indian wrestling match. My mother-in-law was drinking the Geritol and holding onto the milk of magnesia! My husband was counting the tissues on the toilet paper rolls and muttering "I feel good all under" & mentioned that his clothes smell funny. My son was yelling that I got chocolate on his peanut butter...the doorbell rang...the man wanted my Clorox for a week. I told him to buzz off and slammed the door!

My husband came into the kitchen & I offered him a cup of coffee to which he replied, "Your lousy coffee? No, thanks". I sighed, Mrs. Olson didn't happen to be a neighbor of mine, so I said, "Well, you're never too old for Kool-Aid". "Never mind", he said, poured himself some iced tea,

(continued on next page)

ron's Smog cont.

ent to the pool and fell in backward while drinking down his tea!

I decided I've had enough, I was going to rest! I went upstairs a nervous wreck! I opened the medicine chest to get some aspirin and this guy says, "Hi, I'm your neighbor & we share the same medicine chest." I said, "I'll bet!", grabbed the Vanquish and slammed the door...it broke the mirror! Oh, well, seven years of bad luck can't be any worse than this!!

Dit-dit-dit-da!!!!

+++++

MARMADUKE

"Sometimes I Wonder,
Marmaduke. Are You Our
Pet or Are We Your Pet?"

+++++

The Endangered Species.....Mr. Ryman

It seems that there is in nature many cycles of life. Life spans are measured in cycles and the evolvement of life itself within this cycle contains a cycle.

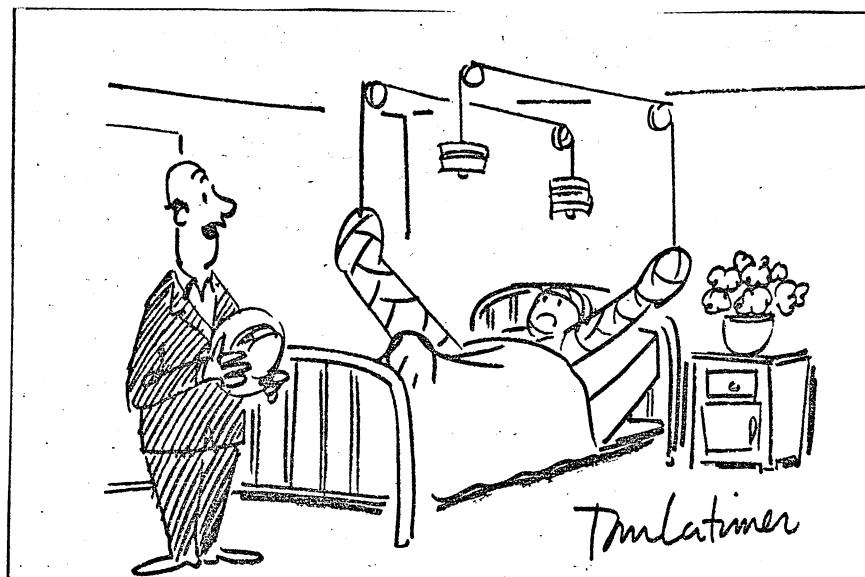

We think nothing of endangering some of the species in our environment because we label them "pests". Therefore, they can be "eliminated" from the balance of nature. However, we forget that the "pest" no longer

(continued in next col.)

"bugging us" is the sole supporter of some other species' life cycle, either as food or some other life support purpose. This will cause a benefactor species to die out (having lost its support) or will cause it to evolve from benefactor to parasite species. And thus we begin a program to eliminate this species from "bugging us".

Because man has played with the basic life cycle of God's creation, we find ourselves in fear of famine and over population. We face food and power shortages. We no longer fear the lion, but fear the viruses. We don't run from the elephant, but we wonder if we can survive a holiday week-end!!! What are we saying? Man's greatest predator is himself!

+++++

IF IT'S ANY CONSOLATION, John, THE GUYS IN THE SHOP ARE STILL LAUGHING ABOUT THE FUNNY WAY YOU SCREAMED.

Congratulations John Miller upon receiving your Private Pilot's license!

WOMEN'S PAGE

KATE MOORE

HOW TO BAKE A CAKE

Light oven; get out bowl, spoons and ingredients. Grease pan, crack nuts. Remove 18 blocks and 7 toy automobiles from kitchen table. Measure out two cups of flour; remove Johnny's hands from the flour and wash the flour off Johnny. Put flour, baking powder, salt in sifter. Get dustpan and brush up pieces of bowl that Johnny knocked off the table and onto the floor. Get another bowl. Answer doorbell. Return to kitchen. Remove Johnny's hands from bowl. Wash Johnny. Get out egg. Answer phone. Return. Take out greased pan. Remove 1/4 inch salt from pan. Look for Johnny. Return to kitchen and find Johnny; remove his hands from bowl; wash shortening, etc. off him. Take up greased pan and find 1/4 inch layer of nutshells in it. Head for Johnny, who flees, knocking bowl off table. Wash kitchen floor. Wash table. Wash walls. Wash dishes. Call up the baker. LIE DOWN.

DID YOU HEAR? About the masseur who had to go out of business--he rubbed people the wrong way----- About the termite that favored swanky apartment buildings--it had a suite tooth-----About the executive who had a peach of a secretary-- until his wife canned her----

A THOUGHT FOR THE DAY

If we would be religious---and a little more like God---then we should note His sun comes up-----on evil men and good----He sends His rain upon the just--- and on the unjust, too----so if we seek to be like Him-----then we should likewise do-----Though we cannot command the sun---nor yet the rain control--- still we can bless our enemy----and pray God for his soul----and we can let the sun and rain----of love on each man fall----till more and more we shall be like----the Father of us all.

FEEL LIKE SINGING?

While Driving Try These;
At 45 miles per hour, sing
"HIGHWAYS ARE HAPPY WAYS."

At 55 miles per hour, sing "I'M
BUT A STRANGER HERE, HEAVEN IS
MY HOME."

At 65 miles per hour, sing "NEAR
MY GOD TO THEE."

At 75 miles per hour, sing "WHEN
THE ROLL IS CALLED UP YONDER,
I'LL BE THERE."

At 85 miles per hour, sing
"LORD, I'M COMING HOME."

DRIVE CAREFUL

HOUSEHOLD HINTS

When going on an outing, stick a tube of shaving cream in your pocket for washing hands. It is easier to carry than a bar of soap and does the cleanup job as effectively.

TO YOU LUCY,

We sincerely wish you the very best. We all will miss you. May God be with you and may you be a blessing to everyone you will come in contact with. Be sure and come back and visit us.
